

# FOAMIQ: FLAMMABLE LIQUIDS TECHNICIAN

8-HOUR TRAINING COURSE

## COURSE OVERVIEW

This comprehensive 8-hour course is designed for technician-level personnel and combines lectures and hands-on training. Participants will gain essential knowledge and practical skills to manage flammable liquids using foam systems effectively.

## COURSE HIGHLIGHTS

- Understand the chemical and physical properties of common flammable liquids.
- Learn the science behind foam and its application techniques.
- Operate foam eductors and on-board foam systems.
- Calculate foam bucket duration and perform basic foam eductor maintenance.
- Set up handlines and foam equipment using department resources
